

LITTLE BIG GUIDE TO GREENER WORLD

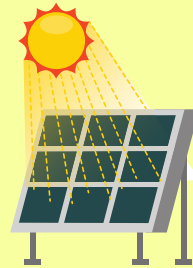

THIS BOOK BELONGS TO

LET'S TEST YOUR KNOWLEDGE

CIRCLE THE THINGS THAT YOU BELIEVE CAUSE CLIMATE CHANGE

Hi! My name is Fifi and I'm here with Lolo.

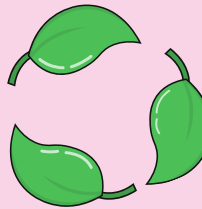

Hello everyone! My name is Lolo. We are talking to you guys about the environment and Climate Change.

Absolutely, lolo! We're going to work together to talk and explain about the environment and climate change. Yay! let's start together Lolo.

Fifi, Do you know about Environment?

Yes Lolo, it is very easy to understand that Everything around us and affecting us during our lifetime is called environment. It can include both Living and Non-living things.

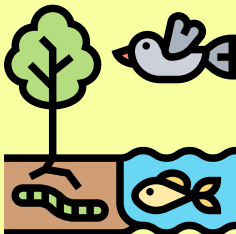

Living Things:

Plants

Animals

Humans

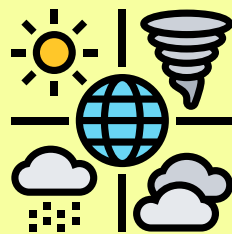

Non-Living Things:

Air

Water

Sunlight and Weather

Hmm, but do you think Climate is important for us as kids??

Yes. very much as it gives us air to breathe, clean water to drink, food to eat, and a place to live.

Ohh! I didn't think this way. So are we Impacting our Environment?

YES, Things like throwing trash on the outside in public places, using too much plastic, cutting down trees, and wasting water can harm the Earth very badly.

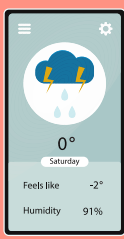

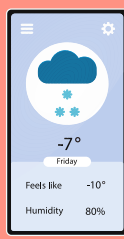

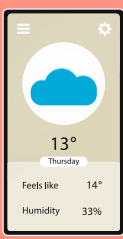

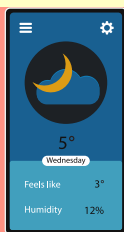

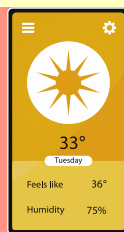

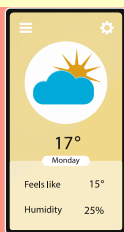

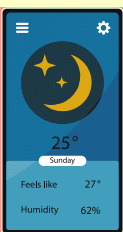

Fifi, Let's talk about weather Now.

Weather is the day-to-day changes in the atmosphere at a given time and place.

Weather can be warm or chilly, dry or rainy, and bright or cloudy. It can Change anytime

So Climate is how the weather in a place usually is over a long time And it stays the same.

Fifi want's to play a game with you. Are you ready?

The environment includes both living and non-living things.

True/ False

Humans are not part of the environment.

True/ False

Trees, flowers, and grass are examples of non-living things.

True/ False

Air and water are part of the non-living environment.

True/ False

The environment is not important for our health and safety.

True/ False

Weather changes every day, but climate stays the same for a long time.

True/ False

The atmosphere is like a blanket around the Earth that protects us.

True/ False

Pakistan has only one season throughout the year.

True/ False

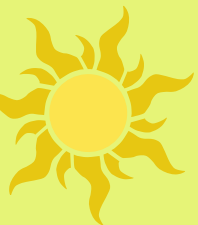

Cutting down trees and throwing trash can harm the environment.

True/ False

Karachi is a city in Pakistan that stays warm most of the year.

True/ False

Guys, how was the fun activity?

Now, let's move on to something called climate change!

Hurry! so climate change is different from environment?

Yes it is, as climate is long-term shifts in weather. Climate Change can be natural or due to human activities.

- It's like when the Earth's weather changes a lot over a long time, like getting hotter, colder, or stormier because of things like pollution.

- Thus, Climate change is about big weather changes over time, while the environment is everything that makes up our world!

WORDS TO FIND:

Weather

Deforestation

Warming

Greenhouse

Floods

Emissions

Atmosphere

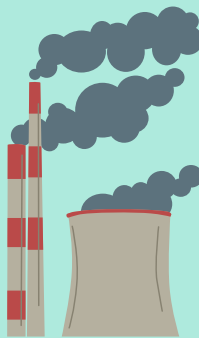

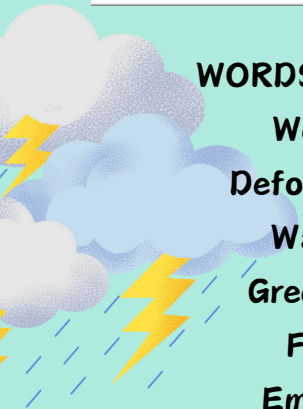

Climate

Carbon

Global

Change

Crisis

How is climate change affecting

Floods

Rising Temperature

Rising sea level

Melting Glaciers

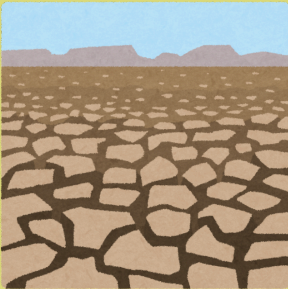

Us with passing time?

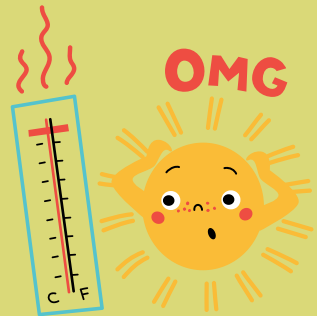

Severe storms

Droughts

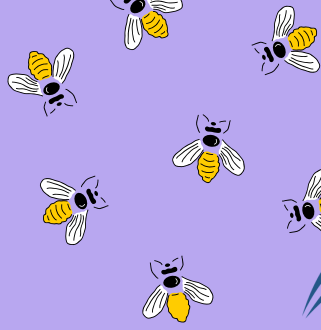

Heat waves

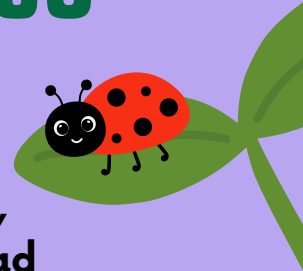

Clap your hands, if you have better idea about climate change. Now Lets work together to fight this issue for our planet, as you are an Eco warrior now.
